

Habitat Enhancement & Creation: GeoTube Technology and Solar PV Power on SS Playa, Torres Martinez Wetlands and Salton Sea Authority

The Salton Sea Authority in partnership with the Torres Martinez Tribe will restore nine existing ponds at the Torres Martinez wetlands, enhance two existing ponds, create 20 acres of new habitat using new berm technology (GeoTubes) and develop photovoltaic (PV) capability to power reliable and sustainable water delivery to all ponds.

The wetlands are located at the North end of the Sea.
